

ATEC AMERICA

LTA-380 TELLER CASH RECYCLER

The LTA-380 sets a new standard in the banking industry with its unparalleled features and capabilities, improving teller operations efficiency and enhancing human interaction with customers while handling 16,250 banknotes.

ADVANCED FUNCTIONALITY

Includes transit cassette, self-audit, high speed and capacity

KEEP IT SIMPLE

Simple safe design, short verification, and separation of reject and overflow notes make the teller's life much simpler in managing the day-to-day operations

LTA-380 TELLER CASH RECYCLER

The LTA-380 teller cash recycler is a leap forward in cash transaction management for the banking and retail sectors. Its groundbreaking design, with a short bill path outside the safe, drastically reduces cash jams and the need for secure access, thereby boosting operational efficiency. This frees up cash handlers to focus on customer service, elevating the overall client experience.

FEATURES

- + 8-inch foldable color screen
- + Loading and unloading with secured transit cassette
- + Unattended self-audit
- + Multiple users can utilize simultaneously
- + Under the desk design to save space
- + Continuous feeding
- + Up to 12 denominations
- + High transaction speeds (12 notes per second)
- + Elaborate banknote recognition
- + Auto-settlement of daily closing

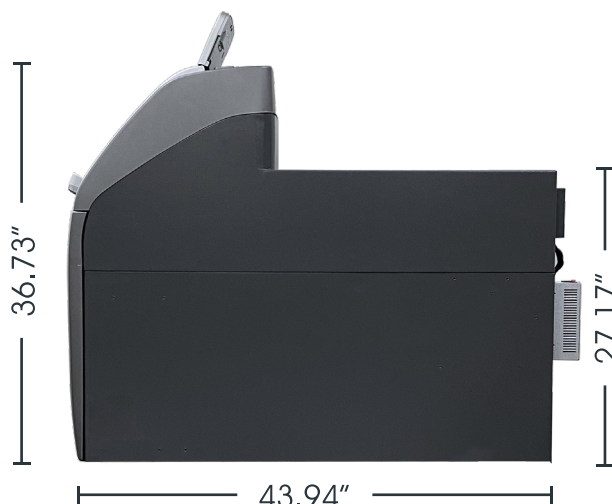

RELIABLE SECURITY

- + Counterfeit/damaged note validation
- + Note serial number recognition and tracking
- + International standard certification safe
- + Anti-theft floor mounting

ATEC America offers a range of cash recyclers that are tailored towards specific locations and their cash management needs.
